

# HENRY COUNTY SCHOOLS

## Milestones Resources for Families

As we approach the end of the school year, we enter into our state testing season. If your child is in grades 3-8, Algebra 1, Biology, US History, or American Literature, he/she will participate in the Georgia Milestones during April and May. As such, Henry County Schools has created a page of resources for families to ready students for the tests.

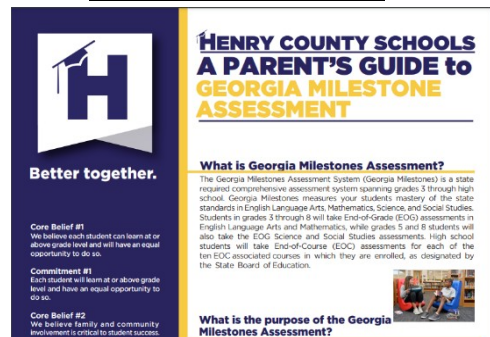

Our Parent Resource page has valuable resources for all state testing your child will participate in during his/her school career. For the Milestones, HCS has a recorded presentation explaining the Milestones test. An overview of the test design is available in the informational pamphlets to help you understand the purpose of the assessment and provide links to resources from the GADOE for families. There are also guides to help families interpret and use your child's Milestones report once it is returned in the Fall. Please, take the time to visit our resource page and take advantage of these resources. A link to the district web page can be found below. Directions to navigate to these resources from the district website are also included on the next page.
