

Today we are going to begin our GA colony

# VISION vs REALITY

foldable

1. Get a LARGE sheet of paper from your teacher.

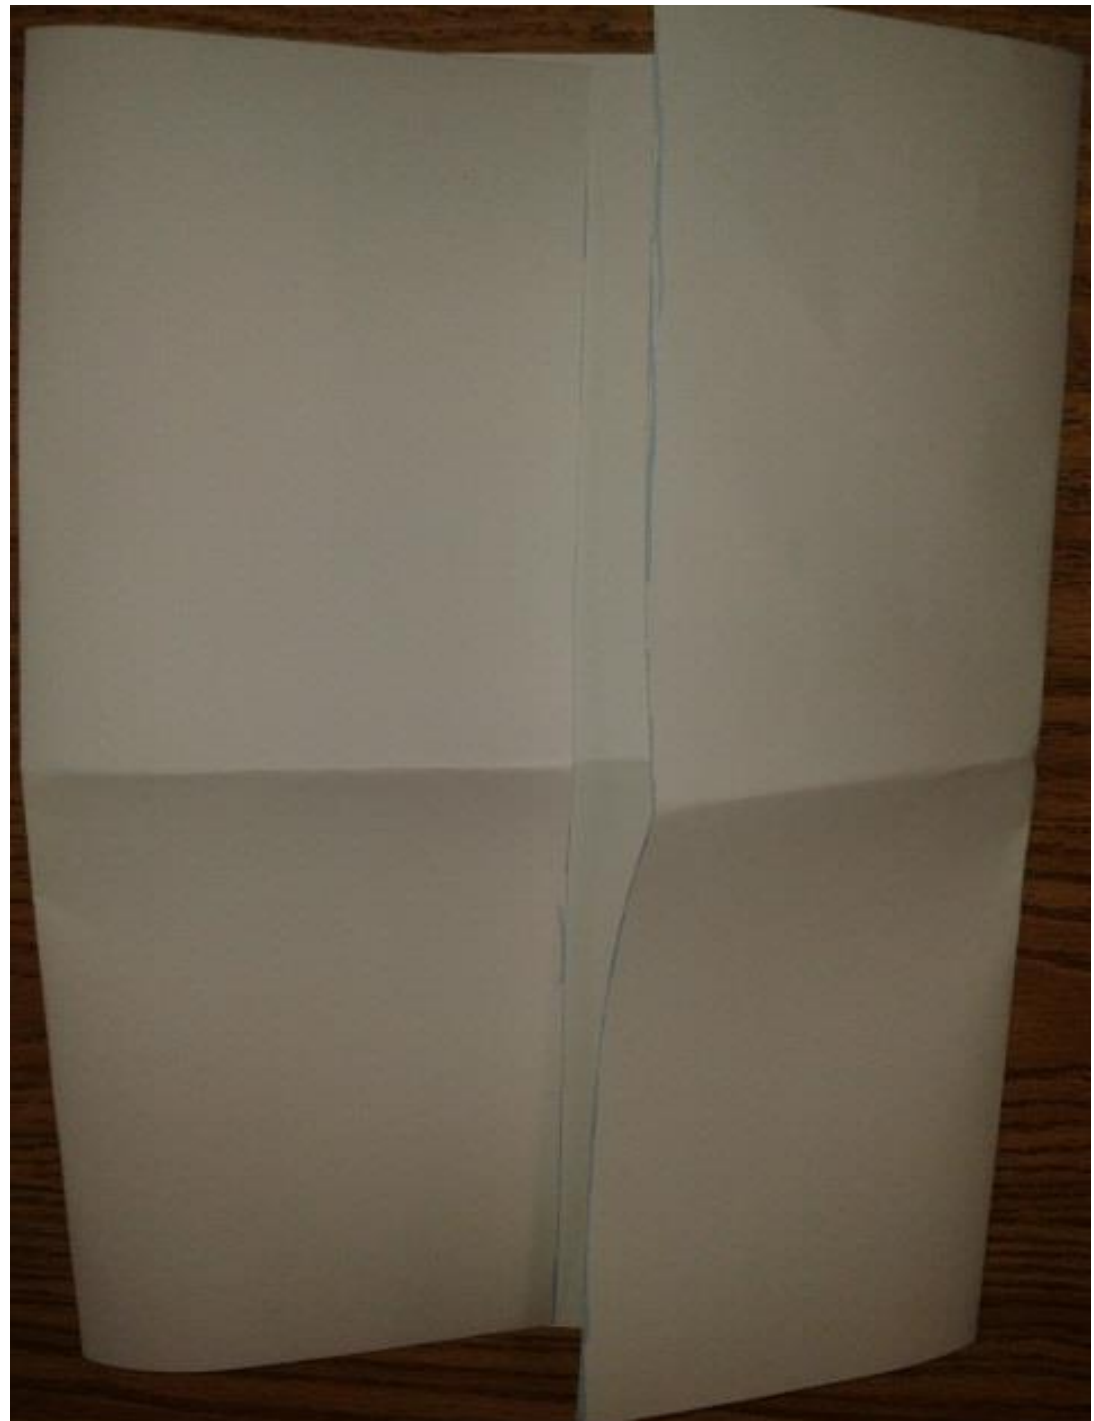

2. Take the outer edges of the paper and make them TOUCH in the middle.

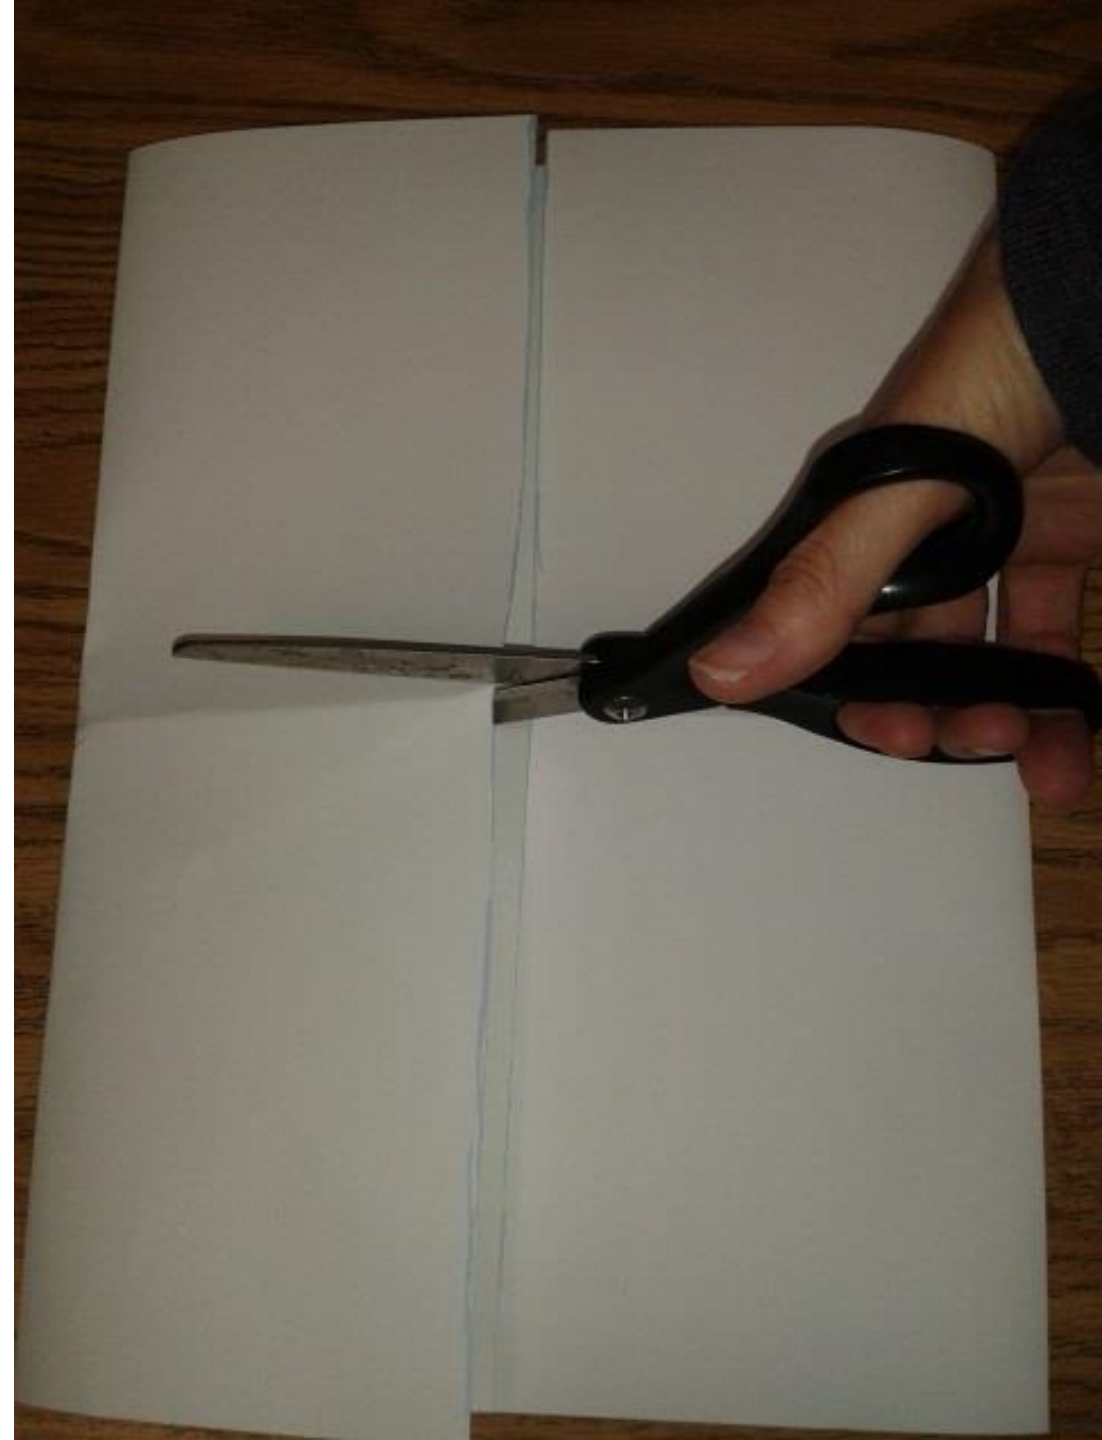

then

3. Crease the outer edges of your paper.

4. Fold your paper to make a crease line across the CENTER of your paper (line up the outer edges)

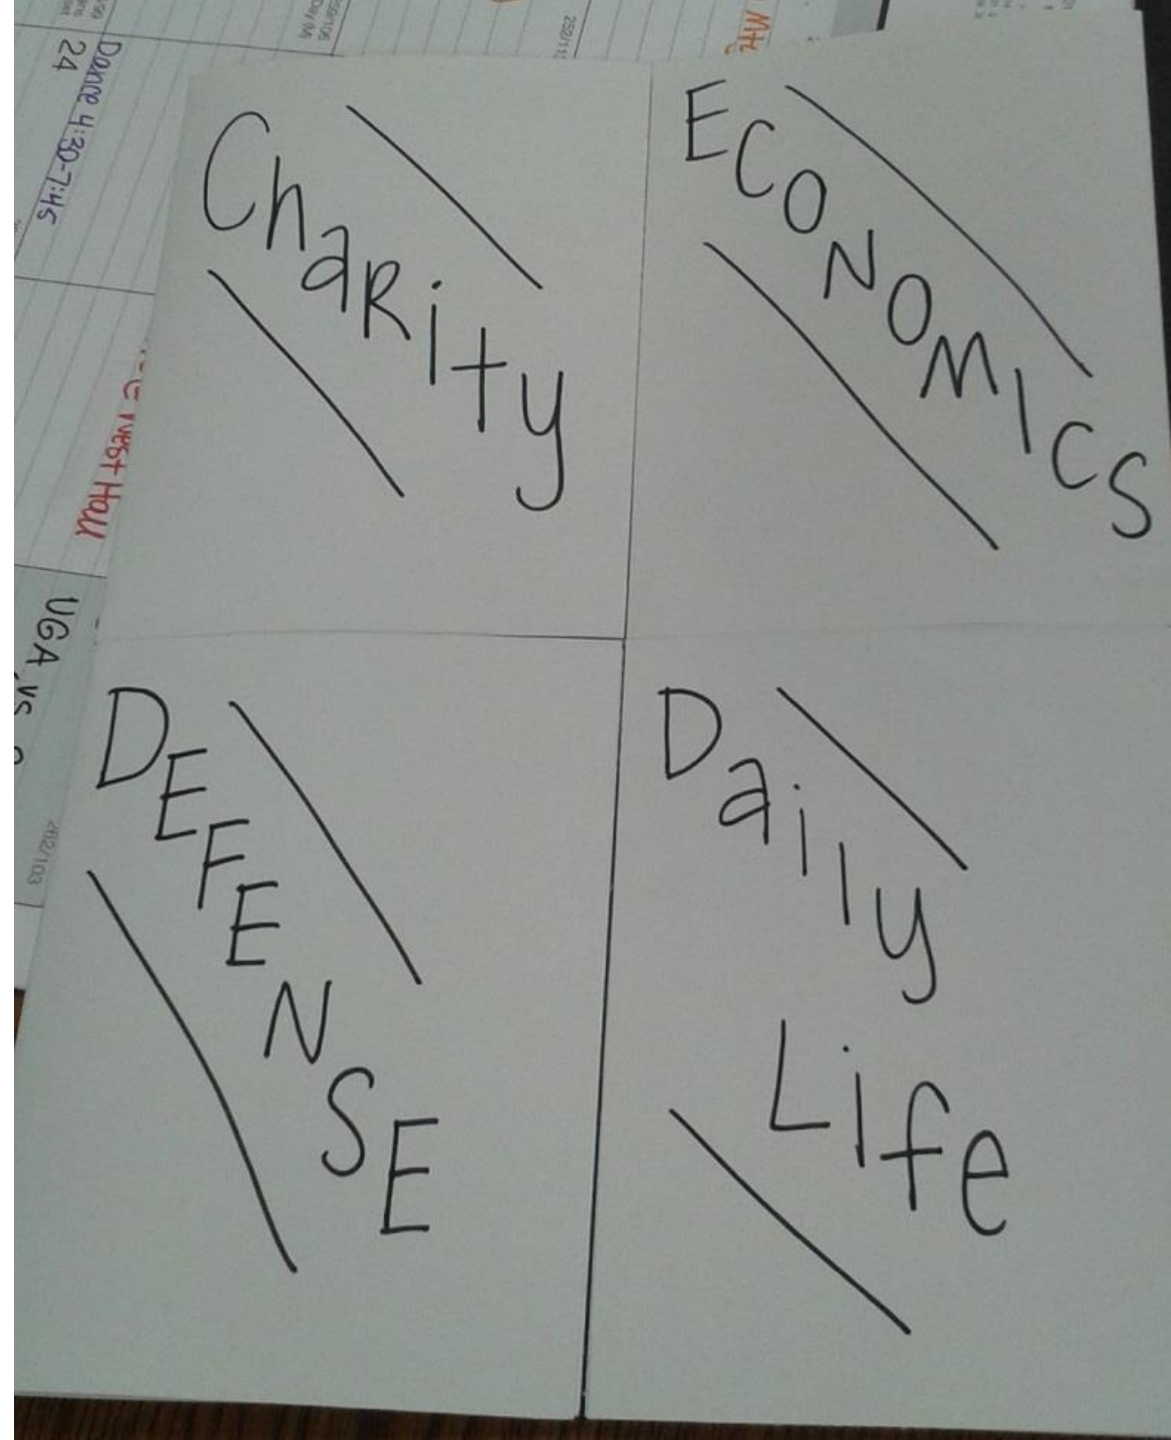

5. CUT along your crease line so that you end up with 4 sections that you can flip open.

Label your 4 sections  
IN THIS ORDER

(You may be **creative**  
with your colors and  
fonts, but the ORDER  
must be exactly like this.)

Now label the INSIDE sections **IN THIS ORDER**  
(Yes, the bottom sections are just like the top.)

You will complete the inside of your foldable

in the following order. The numbers are a clue as to how many answers are in each box on the answer key.

--A picture is needed for each vision and reality.
