A PARENT'S GUIDE to

GEORGIA'S CCRPI

Georgia's Annual School, District, and State Accountability System

What is CCRPI?

The College and Career Ready Performance Index - CCRPI - is Georgia's state accountability tool for annually measuring public schools and districts throughout the state. The state's purpose for CCRPI is to provide a comprehensive accountability model and communication platform for all stakeholders in the state of Georgia.

What can I learn from CCRPI?

CCRPI is comprised of 4 main categories with a 5th category of graduation rate included for high schools.

The **Content Mastery** category provides parents with an answer to the question of: **Are students achieving at the level necessary to be prepared for the next grade, college, or career?**

This area focuses on measuring achievement in English language arts, mathematics, science, and social studies through the Georgia Milestones Assessment System

The **Progress** category offers parents insights into: **How much growth are students demonstrating relative to academically- similar students?**

This area focuses on how much students grow in their English language arts and mathematics knowledge compared to similar students across the state.

The **Closing Gaps** category addresses the question: **Are all students and all student subgroups making Improvements in achievement rates?**

This area focuses on measuring the extent to which all students and all student subgroups are meeting annual achievement improvement targets.

Finally, the **Readiness** category provides information on whether students are **participating in activities preparing them for and demonstrating readiness for the next level, college, or career?**

This area focuses on literacy, student attendance, and learning beyond core subjects for elementary and middle schools. In high school, there is a focus on literacy and student attendance in addition to accelerated course enrollment, career pathway completion, and demonstration of college and career readiness.

A fifth component – **Graduation Rate** – exists for high school only and provides parents with information on **are students graduating from high school with a regular diploma in four or five years?**

This area takes into account both four- and five-year adjusted cohort graduation rates.

How are categories weighted in CCRPI's calculation?

There are scores received in each of the aforementioned areas, and they are totaled together to give the school a score based on a 100-point measurement.

	Elementary	Middle	High
Content Mastery	30%	30%	30%
Progress	35%	35%	30%
Closing Gaps	15%	15%	10%
Readiness	20%	20%	15%
Graduation Rates	--	--	15%

Additional information regarding the CCRPI's calculations and system and school scores can be found on the GaDOE accountability webpage: <http://accountability.gadoe.org>

What are the school climate and financial efficiency star ratings?

School Climate and Financial Efficiency Star Ratings are displayed on the CCRPI reports as informational components but carry no point value for the CCRPI score.

Each school receives a School Climate Star Rating, which is calculated using data from surveys issued to students, personnel, and parents through the Georgia Student Health Survey 2.0; Georgia School Personnel Survey; Georgia Parent Survey; along with student discipline data and attendance records for students, teachers, staff and administrators.

To view your school's scores, go to the Georgia Department of Education's portal: <http://accountability.gadoe.org>.
