

E SPLOST 6

Expanding opportunities for pennies.

What can ESPLOST do for our school?

SAFETY & SECURITY

Henry County Schools is committed to enhancing and upgrading safety and security measures. E-SPLOST 6 will provide all schools with Security Access Controls to ensure buildings are secure.

TECHNOLOGY

Technology quickly becomes outdated and in need of a refresh approximately five years after being introduced. E-SPLOST 6 funds will refresh the current 1:1 technology across the district and provide other necessary upgrades to support digital infrastructure and access for all students and staff.

TRANSPORTATION

Buses and modernized transportation maintenance facilities are essential to ensuring our students can get to and from school, as well as other learning opportunities and extracurricular activities outside of the school. Henry County Schools will replace 25 buses per year during the E-SPLOST collection period to modernize the fleet. And a new facility will be constructed to support bus maintenance and alleviate the overcrowded main facility which will also be renovated.

RESOURCES/INSTRUCTIONAL SUPPORT GROWTH & REPLACEMENT

E-SPLOST funds can be used for instructional resource purchases, and this will be a focus of E-SPLOST 6. Additionally, the funds collected will support growth and replacement of key resources for fine arts, health/PE, and Career, Technical, and Agricultural Education courses.

UNIQUE EAST LAKE ES ENHANCEMENTS

SIGNAGE - DIGITAL SCHOOL MARQUEES

Each school will get a new communication tool to help keep their school communities informed. Electronic marquees will replace the current signage at the street entrance to each campus.

HVAC REPLACEMENT

It is time to replace the current HVAC equipment for the building. The current E-SPLOST will cover the costs of replacing this entire system for the school.

ENERGY MANAGEMENT UPGRADES

Henry County Schools has taken steps to maximize the energy efficiency and savings for every school and building in the district. The latest energy management updates to this school will ensure the greatest amount of savings while prioritizing energy efficiency for the building.

EXPANSION AT UGMS

While not a direct expansion of your school, this proposed expansion will impact students and families in this school cluster for years to come. It addresses some of the needs identified after a review of the current and anticipated growth and space requirements in the cluster.

DISTRICT-WIDE ENHANCEMENTS

STEM HIGH SCHOOL

Community voices made clear the need for greater opportunities and access to Science, Technology, Engineering, and Mathematics- focused curriculum. To that end, the district will construct a STEM High School to enhance this opportunity to engage in highly-concentrated curriculum and access to pathways for district students.

TRANSPORTATION HUB

With Henry County being one of the largest sized counties in the state from a geographical standpoint, our bus fleet was in need of easier access to a modernized maintenance facility to keep transportation running smoothly. A new facility will be constructed on the west side of I-75 while a renovation is also planned for the current bus maintenance shop.

ADMINISTRATION OFFICE BUILDING

As the 8th largest school district in Georgia, it takes an efficient and highly-capable district office staff to plan for, manage, and support growth in the county. The addition of a new administration building and renovation of the current facility will allow for operations to once again be centralized as they have been relocated in available space around the district due to current limitations at the main district office facility.

OTHER AREAS OF FOCUS

Henry County Schools always has its eyes on the future and addressing the anticipated needs of a growing student population and expanding employee roster. As utilized in previous E-SPLOSTs, the current proposed E-SPLOST 6 does allow for the purchase of land for future growth and development as needed.
