

Information Services has implemented a new login option for students in Grades PreK – 2nd grade for the Chromebook. Each student will be provided a QuickCard QR code that will be scanned by the camera on the Chromebook and automatically log the student in. This process will reduce the amount of time needed to get all students signed in for instructional activities utilizing digital resources.

Pre-K, Kindergarten, First and Second Graders will login to their Chromebook using a QuickCard.

Students will open their Chromebook, power on the device and choose "Sign in with QuickCard."

Scan the QR code to watch a short video to see how it works.

Note: Students without QuickCards can choose the Sign In option and use their provided HCS credentials.
