What will honors or AP courses mean for my GPA?

For HOPE purposes only, **grades in honors** classes will be weighted in the following manner:

- Henry County students get a weight of 5 points added to their earned numerical grades in honors courses for determining class rank and GPA for college applications.
- In determining HOPE Scholarship eligibility, the 5 points added by HCPS will be subtracted from the honors grade (for HOPE purposes only).

For HOPE purposes only, **grades in Advanced Placement (AP)** classes will be weighted in the following manner:

- Henry County students get a weight of 10 points added to their earned numerical grades in AP courses for determining class rank and GPA for college applications.
- In determining HOPE Scholarship eligibility, the 10 points added by HCPS will be subtracted from the AP grade (for HOPE purposes only).
- For the HOPE average only, the “unweighted” numerical grade will be converted to a 4.0 scale, then .5 points will be added to the converted score. No grades higher than a 4.0 will be awarded.

Example: A student earns an 88 in AP Biology, and has a weighted numerical average of 98 with the 10 points. For determining class rank and GPA for college applications, the grade would be considered an “A” with a 98 numerical average and a 4.0 on the HCPS grading scale. For HOPE Scholarship eligibility only, the *unweighted* numerical average of 88, considered a “B,” would be converted to a 3.0, then .5 would be added back for a 3.5. If the student had a 92 unweighted average (102 with the 10 points), the converted score would be a 4.0 both for class rank purposes and for HOPE purposes.
